Half of the world population especially those inhabiting highly populated areas of the humid tropics and subtropics, rely on rice as their primary source of carbohydrate. Monocotyledonous rice is a diploid plant (2n-24) with a haploid genome equivalent of 431 Mbp (Arumuganathan and Barle, 1991). The relatively small

Half of the world population especially those inhabiting highly populated areas of the humid tropics and subtropics. rely on rice as their primary source of carbohydrate. Monocotyledonous rice is a diploid plant (Al=24) with a haploid genome equivalent of 411 Mbp (Arumuganathan and Barle, 1991). The relatively small genome of rice, three times larger than that of Arabidopsis, makes it suitable for genomic studies. In order to facilitate positional cloning, physical mapping and genome sequencing of rice, we have constructed a BAC library contains 36.64 clones with an average insert size of 128.5 Kb providing 10.9 haploid genome equivalents. The deep coverage allows the isolation a particular sequence with a probability of 99.9 %. Two high density filters, each containing 18,432 clones (doubly spotted), represent the whole library for collons screening."

```
order to facilitate positional cloning, physical mapping and genome sequencing of rice, we have constructed a BAC library from Oryas astiva. Nipponbare variety. The library contains 36,864 clones with an average insert size of 128.5 Kb providing 10.9 haploid genome equivalents. The deep coverage allows the isolation a particular sequence with a probability of 99.9 %. Two high density filters, each containing 18,432 clones (doubly spotted), represent the whole library for colony screening."
Arabidopsis, makes it suitable for genomic studies. In

Patent No. 6183957

BEREAL INFORMATION

PAPLICANT: Cole, Stewart

APPLICANT: Gordon, Stewart

APPLICANT: Gordon, Stewart

APPLICANT: Bilault, Alain

ITILE OF INVENTION: THE GENOME OF A MYCOBACTERIUM USING A BAC-BASED DNA

TILLE OF INVENTION: LIBRARA APPLICATION TO THE DETECTION OF WYCOBACTERIA

TILLE REPRENCE: 3495-0169

CURRANT APPLICATION WUMBER: US/09/060,756
